KEYMACRO is a visual programming language for developing user interfaces, or skins, for any Windows component. The generated skin is ready for deployment immediately. It uses Visual C++ and all the resources required are added to the project. The code is pure text and is directly compiled to ensure a clean and portable package. The result is a solution ready to be deployed directly in the target application. KEYMACRO is a macro language that is easy to learn and lets you produce the final skin in a few minutes. It offers a user-friendly environment that is integrated with Visual Studio, so that it can easily be used. Besides, it has many functionalities that you can exploit to create complex skins. You can develop skin for any Windows component, from Text Box, Combo Box, List Box, Button, Picture Box, Toolbar Button, Tab, Sheet, List, Grid and so on. KEYMACRO makes things simple and easy. It offers a simple, yet powerful environment for developing skins. You will find all the functionalities that are necessary to develop skin that can be used immediately. ** The skin that KEYMACRO generates can be used in more than one application. ** It is also compatible with Visual Studio 8.0 and higher. ** The generated skin is compatible with visual studio 2012. Features: Key Macro - it is easy to use, but it has advanced features like "graphical editor", "syntax colors" and "code snippets". Skin Builder - it has all the features of the macro (graphical editor, syntax colors, etc.) to build the skin. Data and Skin Builder - with this module, it is easy to insert images, colors and data in the skin and it can be managed by different skins. Graphical Editor - it allows you to modify the graphic elements of the skin. Text Editor - it is a built-in text editor. Syntax colors - it enables the colouring of the elements in the code according to the functions or variables. Code Snippets - it provides you with different pre-defined code blocks that can be reused in your code. Smart Tags - you can use smart tags to create a shortcut for any function. Data Editor - it is used to add values, such as images, colors, data, etc. Ribbons - it is a plug-in that allows you to add ribbon components to your application. Thumbnail Maker - it can create small thumbnails for your skins. P 77a5ca646e

What's New in the TAdvSmoothComboBox?

Create a classy HTML/CSS combo box for use on webpages or as a flexible data input control. The TMS VLC UI Pack also includes a quick-start guide for using TAdvSmoothComboBox on your project. The goal of TAdvSmootherComboBox is to create a versatile combo box that can be used in Windows Forms, ASP.NET, ASP, and so forth. You can use the advanced control to work with visualizations such as date pickers, colors, images and so forth. In fact, the components are accompanied by a quick-start guide that shows you how to use them in Winforms. For those who prefer a more in-depth explanation, you can take advantage of the documentation. In addition, the project has a strong design team as TAdvSmootherComboBox is a high-quality and documented library. We can't wait to see what you will achieve with this advanced control. How to use TAdvSmootherComboBox in your project? If you prefer a fast answer, just use the Precompiled version If you want to use the latest version of the controls from the source code, do the following: 1- Remove everything in the precompiled directory. 2- Download and extract the source code. 3- In the source directory, rename the C:\MyPath\src* files to *_cs. 4- Add the TAdvSmootherComboBox component to your project. 5- From the TAdvSmootherComboBox.sln, rebuild the project. Q: jqgrid.bsgrid.min.js don't work after add filter I have in my jqGrid 4 columns which filtering enable. I have just added a row with a custom link so i can apply a link in the current filter field. I have added it like this : ... onclickRowCallback: function () { var rowId = \$('#id_order_preview_grid').jqGrid('getGridParam','selrow'); \$('#id_order_preview_grid').jqGrid('editGridRow', rowId, true, function () { \$('#id_order_preview_grid').jqGrid('setCell', rowId, 'link_name', '/get/id_order/' + rowId + '/' + \$('#id_user').val() + '/' + \$('#id_order').val()); });

System Requirements:

Windows 8 or later Processor: Intel i3 (2.5 GHz or higher) Intel Core i5 (2.3 GHz or higher) Intel Core i7 (2.7 GHz or higher) AMD Phenom II X3 (3.2 GHz or higher) AMD Phenom II X4 (3.4 GHz or higher) 4GB RAM (8GB recommended) Hard Drive: 60 GB free space on C: drive 1024 MB of VRAM DirectX
